

Sports Betting Software Development

We are a team with over 15 years of experience in sports betting software development. We can provide our assistance and help you develop your own betting platform according to your needs. 

Introducing our

NEW SPORTSBOOK

OUR Solutions

We have features for every step of the way

i-GSN experience and innovative software, will add value to your business and will give you the competitive edge in this highly demanding industry. We can tailor, customise and adapt our software development to provide unique, secure solutions as required.

The next generation in Sports Betting Platform

We offer a fully functional sportsbook suite including integrated applications such as:

- Creation and management of accounts
- Creation of e-bet slips
- Placement and management of bets
- Settling bets by crediting or debiting accounts

Our product ensures transactions are processed efficiently and accounts managed securely.

Designed to cater for the specific needs and functionality of any respected bookmaking organisation, our online betting may be also customised and scaled to include services as required by betting shops, such as mobile and teletext betting, central accounting and user account systems, reports etc.

Shop Betting Solution

The sophisticated modern all-in one POS system, includes printer and scanner services enabling betting shop owners to conduct their business professionally.

The whole process of betting is supported in the most secure and cost-effective way, from the moment of accepting the customers' bets to the settling of winning slips. Real-time automatic updates are available on all events preventing human errors and data inconsistencies from occurring.

The complete system is setup to allow the scanning and processing of customised OMR (optical magnetic recognition) or Mark-Sense and hand written bets, again preventing the risk of errors. It can be installed in an unlimited number of terminals and is fully integrated with a centralised accounting system which minimises risk and allows full control over the betting and settling processes.

Betting Terminals

Our Self-service terminals accept coins, bank notes and provide the customers with a user-friendly interface, allowing them to browse different events and markets prior to placing their bets in a secure and efficient way.

Mobile Betting Solution

I-GSN MULTI-PLATFORM MOBILE APPLICATION ALLOWS REGISTRATION, ACCOUNT ACCESS, BROWSING VARIOUS MARKETS AVAILABLE, PLACING BETS, CHECKING THE STATUS OF ALL CURRENT BETS AND BETTING HISTORY. IT IS AVAILABLE ON IOS, ANDROID, WINDOWS PHONE, LINUX, AND PALM WEBS.

Accessed from anywhere and at anytime

i-GSN Gaming application offers both pre-match and Live betting. Our web application is fully compatible with betting shop integrations. Some functionalities include:

- **Creating & editing matches**
- **monitoring & controlling risk management**
- **Customised Reporting**
- **Monitoring & setting of odds**
- **Pre-defined odds structure**
- **Odds comparison**

Early Cashout

Cash Out lets your players take profit early, or get some of the stake back if the player feels it is a losing bet - all before the event is over, creating more liquidity in the Market and allowing the player to re-bet faster.

Pre-Match

Our Pre-Match sports betting package covers 25 different sports. The sports betting system can integrate any odds provider.

The Application is simple to use, with real time updates from odds providers and responsive modern design.

Live Betting

Our Live sports betting package covers 12 sports and includes more than 10,000 live events per month. There are different ways the live betting can be displayed including real time visualization of the game, which brings the excitement of the game straight to the player. Additional Sports can be added by request.

Statistics

- Live Score - Resulting - Standings Streaks - League Stats – Head to Head Comparisons - - Top Scores

Additional Benefits of our betting system:

- 4. Real-time risk management and fraud detection tools**
- 5. Daily coverage of sports events**
- 6. Efficient and user-friendly terminals**
- 7. Available 24/7**
- 8. Multiple transaction processing**
- 9. Data protection and recovery**

Back Office Management Platform

Offering Comprehensive Management Tools

The back office trading interface is one of the best in the industry. Two of the many features of this application include the pre and post betting liability management as well as customisable live alerts. Traders have a comprehensive view of their risk at all times.

A Pioneer in the Sports Betting Technology

With our experience in this sector and using the latest technologies, we highly believe we are differentiating ourselves from the rest and are setting the bar high in terms of quality. The latest developments in live betting are showcased in the recently released LiveOdds software, which gives the operators the ability to push live odds directly to the players' browser in real time.

Features

1. **Simple and advanced E-Bet slip management**
2. **Easily integrated into existing set-ups**
3. **Odds can be scaled to fit your needs**
4. **Efficient, user-friendly & reliable**
5. **Secure and transparent**
6. **Vast reporting tools**
7. **Multiple languages**
8. **Fully scalable**
9. **Cost effective**
