## Products

---

iSOFTGaming™ is bringing innovation to the gambling industry by connecting the traditional betting with popular lotteries and casino table games.

The players experience real Live action with games starting every 3 to 5 minutes adding more excitement to the games. The professional presenters guide the players throughout the whole game giving them a personalised experience with their friendly and charming approach. The chat facility enables the player to have a direct interaction with the presenter.

That's not all...

- We have accumulated a vast experience in the gambling business, working only with the best technologies which are duly tested, reliable and set to meet the highest quality standards.
  - Our complete solution can cater for betting shops, igaming websites, poker clubs and other entertainment venues, where gambling is promoted.

## Products Overview

## Live Scalable Games

Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5 Lucky 5

### Overview

The game operates 24/7 and each new extraction of the balls takes place within a 5 minute interval between 1 game session and the other. The 5 lucky numbers are drawn out of 36 balls during a live-streamed event. Every draw is audited and has its own serial number used to settle all the bets. The player has the possibility to bet until the start of the consecutive session.

### Special cases:

1. If technical difficulties occur and impede the event to start (i.e. streaming failed and no recording etc...), then all bets are voided and the players are fully refunded at face value.
2. In the event, the presenter makes an error naming the correct combination or if there is no sound during the live stream then the event will be settled by visual information provided during the live stream.
3. If the player fails to see the live stream of a certain event (for reasons such as internet connection failure, power failure etc..) and the recording is available on video archive thereafter, such an event is considered as valid.

A video archive & results are available on our website & at betting locations showing all the past draws.

Bet on Poker is a real-time game having rules and procedures very similar to the "Texas Hold'em Poker", one of the most popular poker variants.

Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7 Lucky 7

## Overview

Game sessions take place every day at five minute intervals, having 7 lucky numbers being extracted out of 42 balls during a live-streamed event. Every edition has its own serial number, which is used to settle all the bets. The player has the possibility to bet until the start of the consecutive session.

## Special cases:

1. If technical difficulties occur and impede the event to start (i.e. streaming failed and no recording etc...), then all bets are voided and the players are fully refunded at face value.
2. In the event, the presenter makes an error naming the correct combination or if there is no sound during the live stream then the event will be settled by visual information provided during the live stream.
3. If the player fails to see the live stream of a certain event (for reasons such as internet connection failure, power failure etc..) and the recording is available on video archive thereafter, such an event is considered as valid.

A video archive and results are available on our website and at betting locations showing all the past draws.

Similarly to “Lucky 5”, “Lucky 7” is a game which combines traditional betting with the popular lottery. The game consists in having 42 numbered balls, half of which are black and the other half are yellow. The total sum of the balls' numbers is 903 (The sum of black ones is 452, while the sum of the yellow balls' numbers is 451).

## Live Scalable Games

Bet - on - Baccarat Bet - on - Baccarat Bet - on - Baccarat Bet - on - Baccarat Bet - on - Baccarat

### Overview

In this game the player needs to decide whether to bet on the “Player” or “Banker” option. The dealer deals two cards to each, in every draw of the game. In some particular instances the dealer draws a third card to the Player and (or) the Banker according to the rules of the game..

### Gameplay:

1. During the first betting round, the bets can be placed even before the cards are dealt. Players can bet on one or more available outcomes.
2. The second betting round. The Player receives the first card and the new odds are displayed on the screen. The bets which are placed during the first betting round have no influence on bets of the second betting round and hence players can bet on the same outcome again.
3. The third betting round. After the second betting round, the Banker receives the first card and the player can see the new odds displayed on the screen. Once this betting round is over the Player and the Banker receive the second card each and when necessary, the third card. The results and the winner of the draw are displayed on the screen.

The Bet-on-Baccarat basic game rules and gameplay are very similar to the Standard Baccarat (referred also to as Punto Banco) which is commonly found in casinos..

## Live Scalable Games

Bet - on - Poker Bet - on - Poker Bet - on - Poker Bet - on - Poker Bet - on - Poker

### Gameplay:

1. The first betting round takes place before any cards have been dealt to the players. The player can choose the seat/s and place the bet accordingly. The number of hands available for placing bets is unlimited. A player may place bets on one to six hands during one betting round.
2. During the second betting round the cards are distributed and the player can see the odds of each hand displayed on the screen. The bets which are placed during the first betting round have no influence on bets of the second betting round and hence players can bet on the same hand in the second round also.
3. After the second betting round is completed, the dealer turns up the first three community cards (the Flop). The player will see the changing odds displayed on the screen and the third betting round begins. At this point the players, like in all betting rounds, are free to place the bets on their chosen betting options irrespective of their bets in the previous betting rounds.
4. Once the time allocated for the fourth betting round has elapsed, the dealer turns up the fifth community card (the River). As the results have been calculated by the system, the winning hand (hands) is (are) marked "Won" and the losing hands are marked "Lost". The winnings are paid to the players and the dealer announces the winner (winners), and a new game starts.

Bet on Poker is a real-time game having rules and procedures very similar to the "Texas Hold'em Poker", one of the most popular poker variants.

Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice Dice

### Overview

The game operates 24/7 having sessions every five minutes. Every edition has its own serial number, which is used to settle the bets. The player has the possibility to bet until the start of the consecutive session.

### Special cases:

1. If technical difficulties occur and impede the event to start (i.e. streaming failed and no recording etc...), then all bets are voided and the players are fully refunded at face value.
2. In the event, the presenter makes an error naming the correct combination or if there is no sound during the live stream then the event will be settled by visual information provided during the live stream.
3. If the player fails to see the live stream of a certain event (for reasons such as internet connection failure, power failure etc..) and the recording is available on video archive thereafter, such an event is considered as valid.
4. If one or more dices are left in the throwing cup or one or more dices settle on the edge of the board & not standing evenly on their sides at the end of the session, then the presenter repeats the event by re-rolling all 5 dices.
5. If one or more dices fall outside the table boundary, then the session is deemed invalid, all bets are voided and refunded to the player at face value.

Dice is a unique and dynamic betting game for intrepid players. The presenter throws 5 hexahedral dices with numbers from 1 to 6.
